Minor Project on

EventX : One Place For All Events

Presented By:

Aashish Adhikari	[PAS079BCT003]
Ashim Shrestha	[PAS079BCT007]
Sagun Paudel	[PAS079BCT032]
Saugat Adhikari	[PAS079BCT036]

Supervised By: Asst. Prof. Nabin Lamichhane

Department Of Electronics And Computer Engineering

13 May, 2026

Problem Statement

EventX

- Event information in university is scattered across multiple channels.
- Students often miss event announcements and updates.
- Scheduling conflicts occur due to uncoordinated planning.
- No unified digital system for managing college events.

Introduction

- EventX is a centralized platform to view upcoming college events.
- Displays events in a modern interactive calendar format.
- Improves visibility and accessibility of event information.

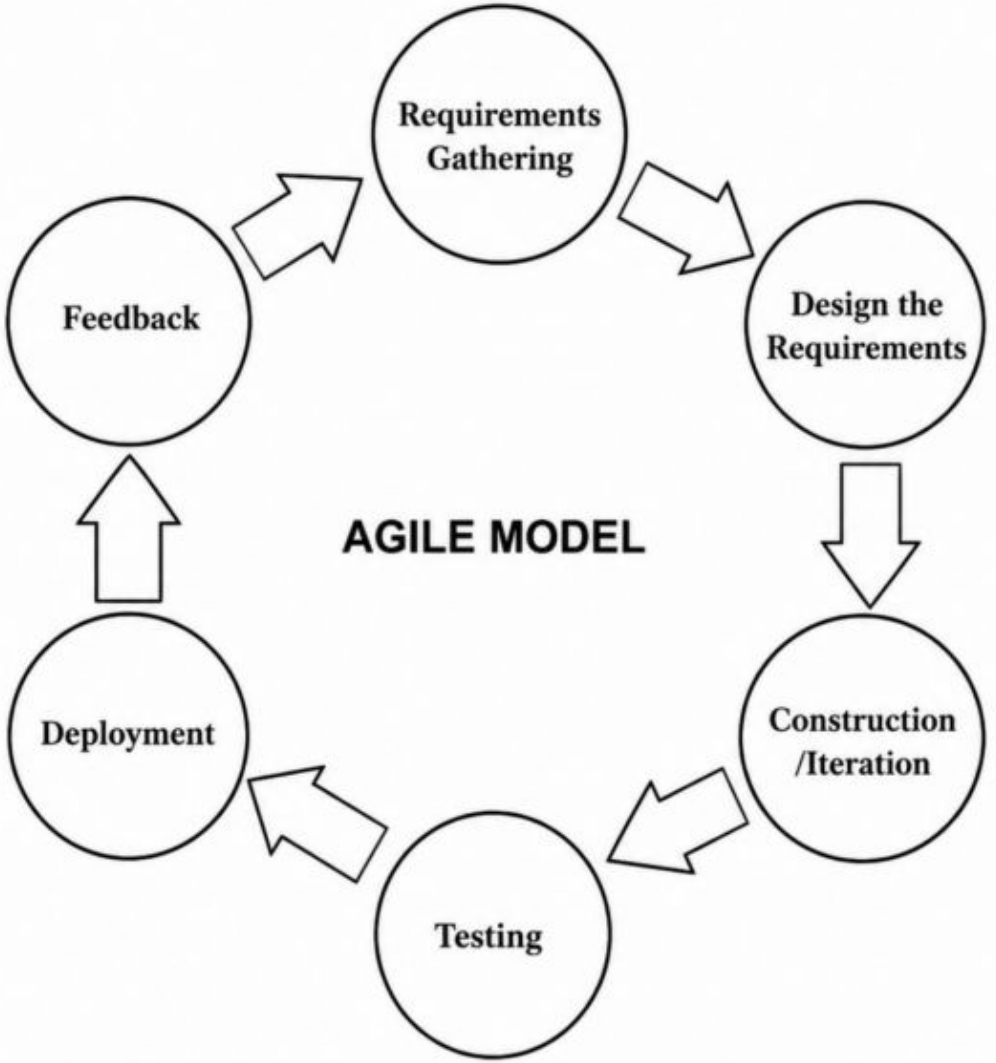

Objective

- To develop a centralized web-based platform for managing curricular and extracurricular events at college.

Literature Review

- Traditional methods like notice boards and classroom announcements are inefficient.
- Existing tools lack university-specific roles and approval workflows.
- Centralized digital calendars improve event coordination and accessibility.

Methodology

Methodology

EventX

Technologies Used:

- Frontend: Next.js with TypeScript, Tailwind CSS, Zustand, Radix UI
- Backend: FastAPI(Python)
- Database: PostgreSQL, Azure Blob Storage
- Design Tools: Figma, Draw.io
- Testing Tools: Postman, FastAPI Swagger UI, Selenium, Faker
- Deployment: Vercel (frontend), Microsoft Azure (backend)
- Version Control: Git and Github
- External APIs: OpenStreetMap (OSM), React Leaflet

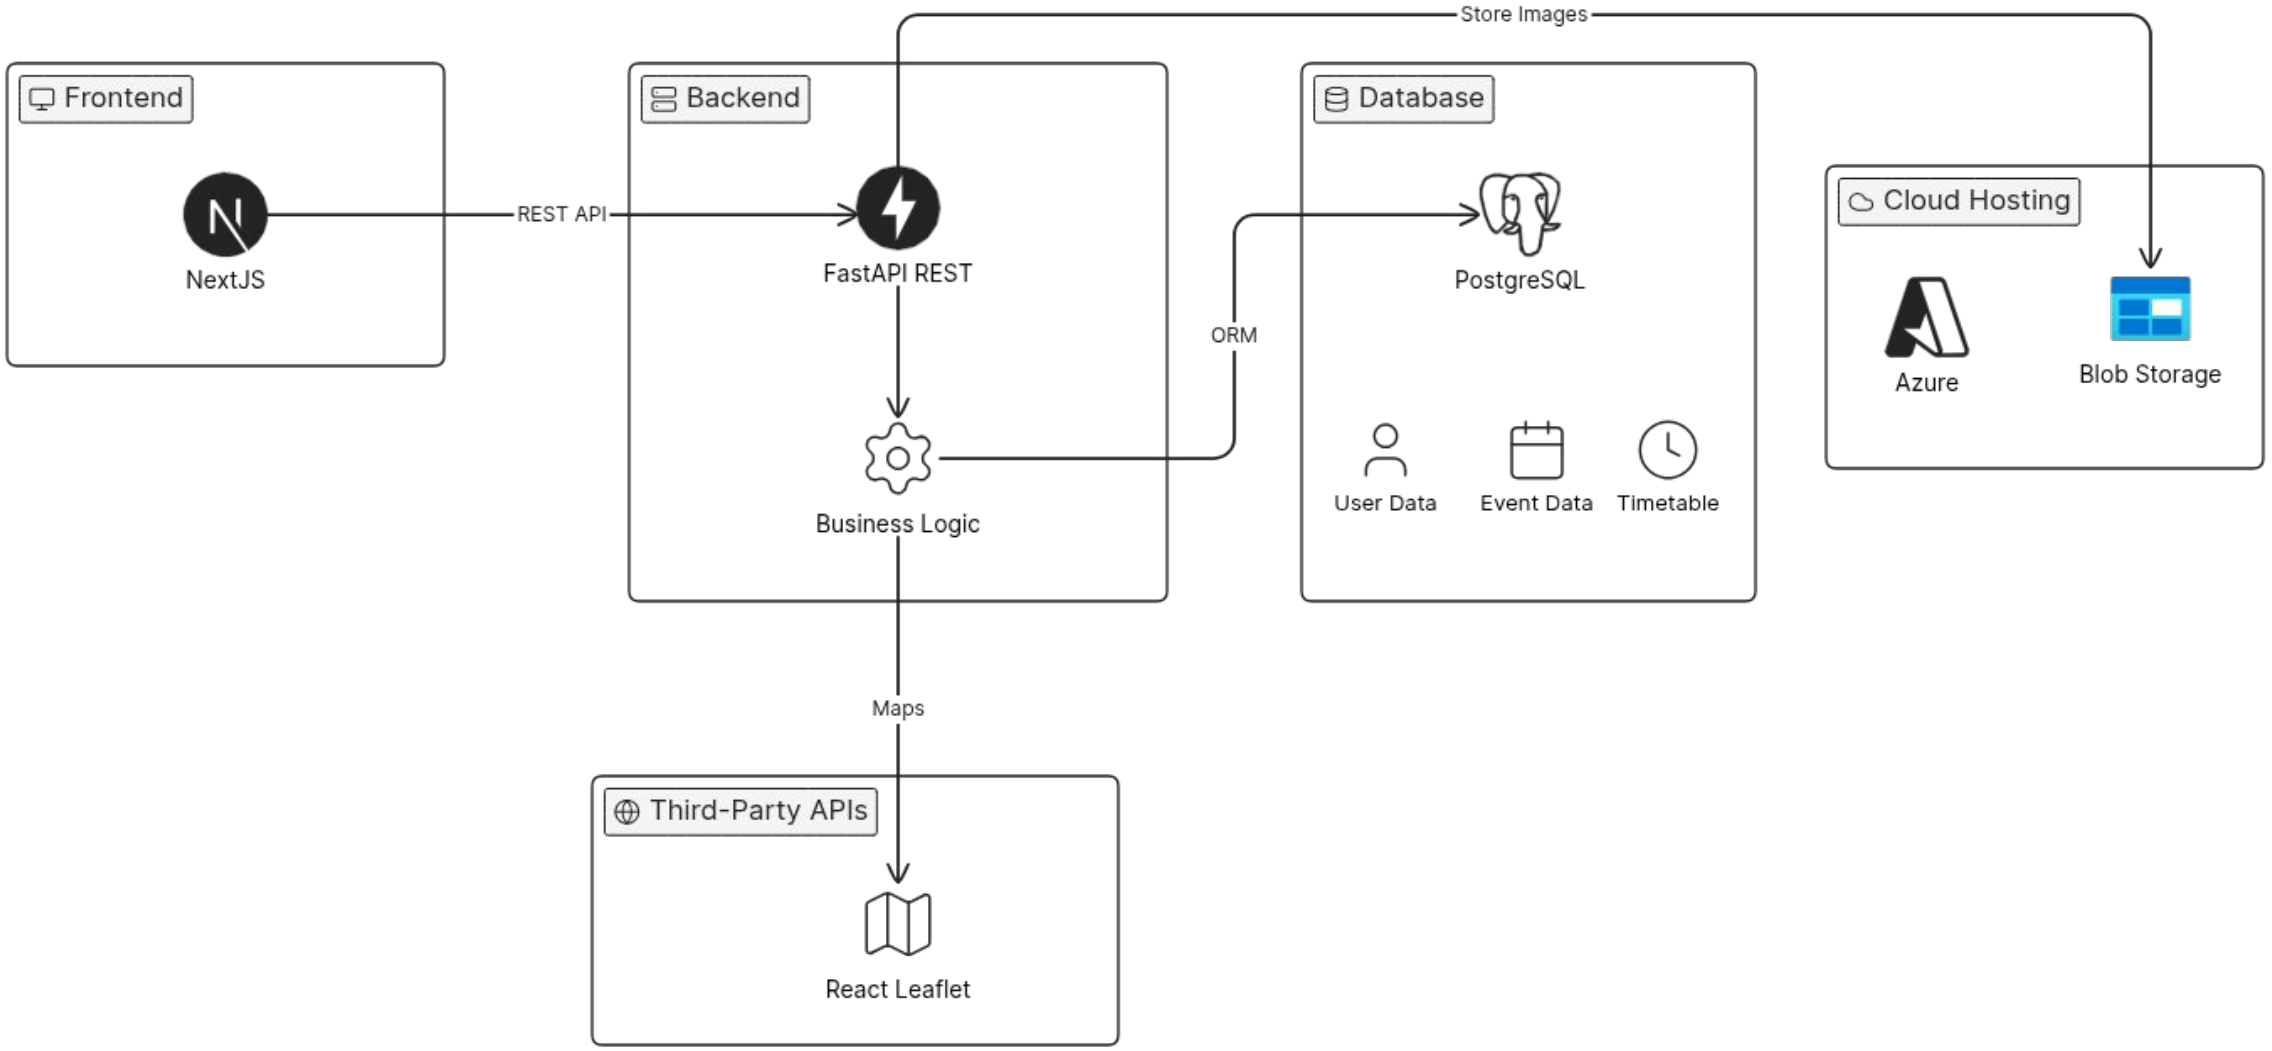

Requirements

- **Functional:**
  Authentication, CRUD events, calendar display, filtering, notifications, analytics.

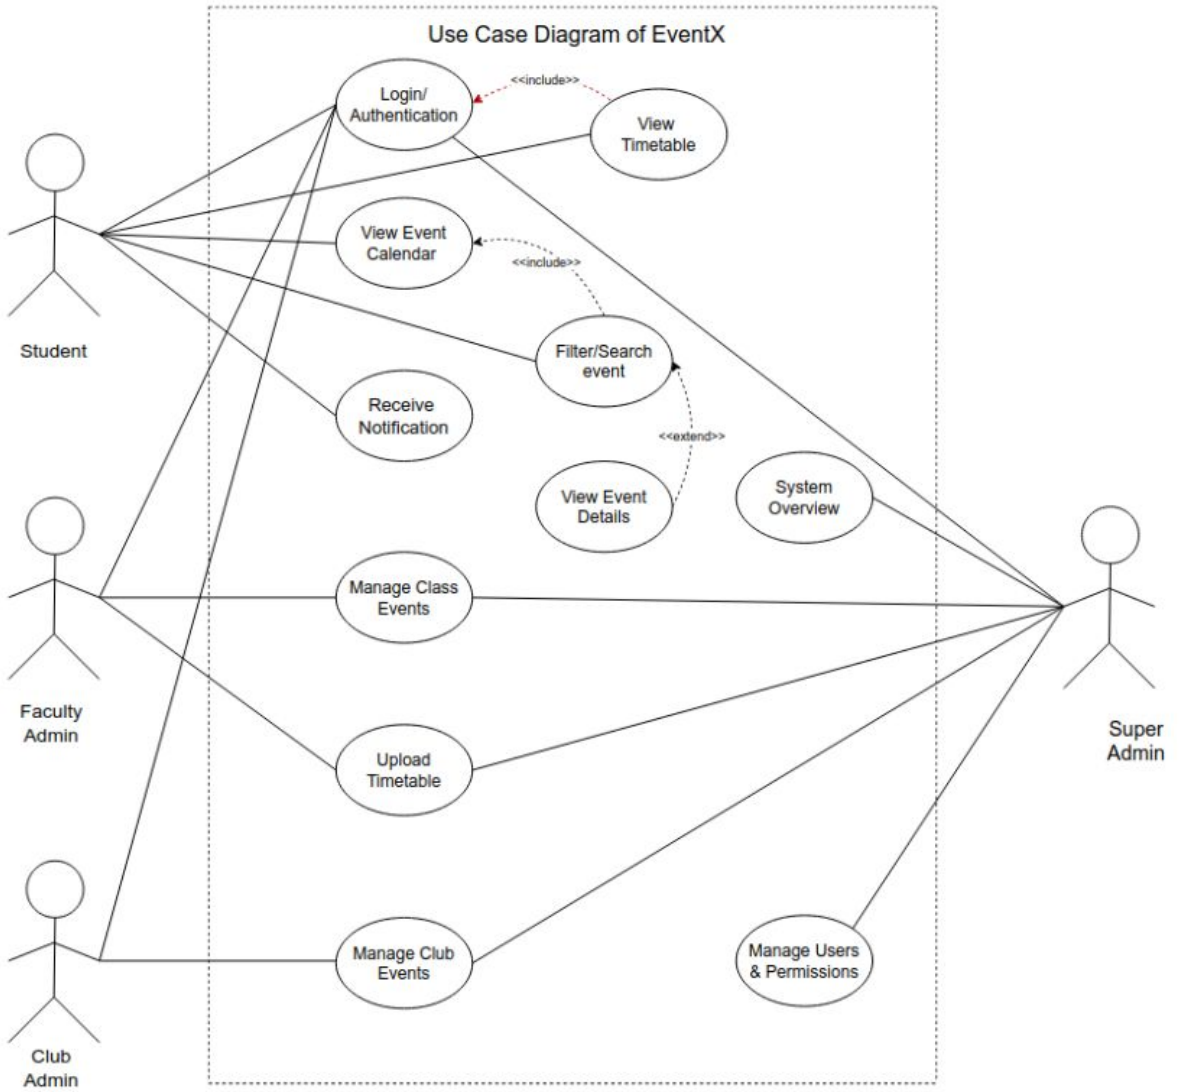

- **Non-Functional:**
  Usability, security, performance, maintainability, scalability.

Batch 79 | Section A

Screenshots: Super Admin Dashboard

EventX

Key Features

- Students can view event details in an interactive calendar.
- Faculty and clubs can manage events digitally.
- Super admin can control and moderate entire system.
- Notification improves attendance and planning.

Challenges Faced

- Ensuring secure user authentication and properly managing role-based access for various types of users.
- Ensuring that EventX can scale effectively while maintaining fast performance
- Ensuring that users receive timely and accurate notifications without delays or missed alerts

Conclusion

- Centralized Event Platform
- Role-Based Management
- Improved Campus Experience
